

Fiery System 9

Make Your Workflow More Productive, Intuitive and Flexible

Digital Print Solutions

efi print to win.

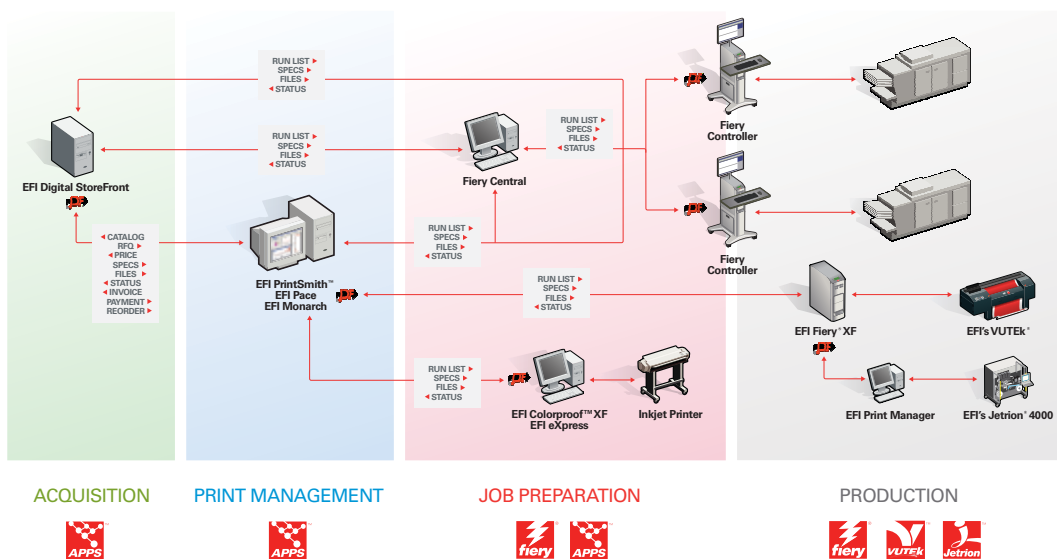

The World's Most Advanced Print Controller Technology

Raise the Value of Every Job You Print

Speed up the work you do now and expand into new markets with the help of the EFI™ Fiery® System 9 print controller technology. Its expanded capabilities and its simpler, smarter support tools make tasks simpler, more error-free and more profitable. You need to deliver superior documents faster, with vibrant and consistent color every time. Fiery System 9 will deliver for you. It does more for you and your customers than any controller we have ever designed.

Fiery System 9 puts into your hands the expert tools you need handle the road ahead – and any job in your queue.

You will enjoy fast, industry-leading and adaptable workflows that connect and integrate with your environment and with other EFI solutions. Fiery System 9 is built on an open platform, so whatever kind of print environment you have, Fiery System 9 is sure to help you address even the most demanding offset and digital printing requirements with ease.

Fiery controllers integrate with your current EFI solutions easily.

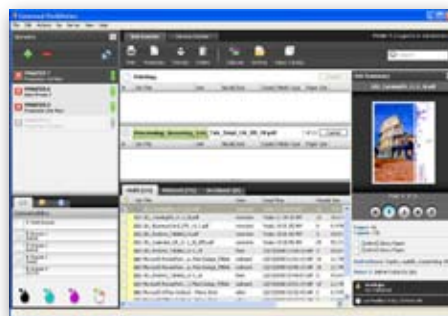

Stay Productive With Job Management That Manages For You

Fiery Command WorkStation 5 simplifies and centralizes job management, connects to all Fiery controllers on the network and helps you achieve optimal results in real time, making everyone from apprentices to master printers more productive on virtually any Mac® or Windows® client.

The integrated document make-ready tools are intuitive and visual, so document management and preparation can be performed effectively with the quickest turnaround time and minimal waste.

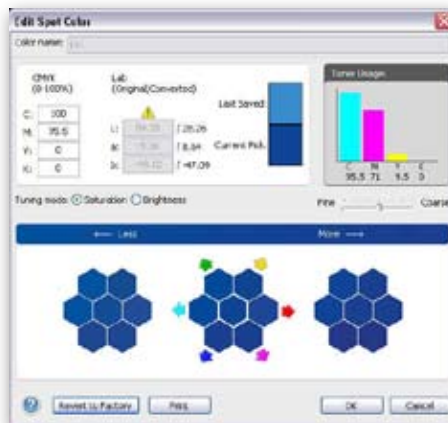

The advanced queue management capabilities included in the Fiery System 9 eliminate bottlenecks and minimize downtime. Automated features, such as Hot Folders and Virtual Printers, eliminate repetitive tasks for faster, error-free printing and improved productivity.

Automate workflow and centralize the management of all print jobs with Fiery Command WorkStation.

Get Precise, Accurate, Reliable Color Output

We know output is everything, and again, the Fiery System 9 software system delivers. The integrated Fiery ColorWise® technology produces precise, consistent color for any document. For extreme color requirements, the optional Fiery Graphic Arts Packages group together expert tools for managing color, proofing, and controlling workflow. The optional Fiery Color Profiler Suite successfully creates, visualizes, tests and edits color profiles with a single profiling solution.

Achieve a better match between the desired color and the printed output with Fiery Spot-On.

Expand Your VDP Capabilities

Fiery's VDP technology accelerates image processing and speeds up merging tasks. They are scalable, work with all popular languages including PPML, and produce effective one-to-one marketing campaigns faster, easier and with more flexibility than competitive solutions.

Print any VDP job with Fiery's VDP technology.

EFI's portfolio of integrated solutions increases productivity and improves your bottom line. Find out more at www.efi.com.

Streamline Your Composition and Imposition Tasks

Fiery SeeSequence Suite is the state-of-the-art in-RIP Fiery option. It brings document composition and imposition together to address all document preparation needs. Its intuitive user interface helps you reduce waste and errors because it shows you exactly how any document will look when printed. Fiery SeeSequence Compose provides centralized document assembly and Fiery SeeSequence Impose streamlines and automates the imposition process. Together they provide you with a tightly integrated and visual workflow, allowing you to accurately set up and soft proof jobs locally or remotely at a Mac or Windows client.

Protect Your Work

With the explosion of viruses and security breaches, protecting company information is important. Fiery System 9 provides a complete administrator toolset to cover all aspects of document and device security. The toolset delivers the most comprehensive security measures in the print industry.

Enjoy Easier Integration

Whatever third-party or EFI solutions you have now, Fiery System 9 helps you protect your investment. Fiery System 9 delivers fast, industry-leading and adaptable workflows that connect and interoperate with your existing environment, third party vendors and other EFI solutions, and allows you to customize it to your business needs. In short, Fiery System 9 is the world's finest print management solution. And it's ready to go to work for you today to prove that claim.
